About This Game

Early 1832,

You invest all of your life savings on a small plot of land and an old house located in the harsh environment of Northern Europe in hopes of a new life and success.

In this farm-building strategy game set in the inclement weather of Northern Europe, you will have to manage your land from clearing forests for farming and selling grain at the neighbouring town to building barns and eventually oil rigs and even shipyards. Your right decisions will allow you to develop, and eventually grow your wealth. The success of your farm depends on the appropriate management of your wealth and expensive resources.

Non-Player Character Digest

This section varies from the standard bestiary format in that it presents a variety of sample NPCs that can instantly be used by the GM, or can be easily customized to meet the requirements of the setting. These also provide a look at the wide range of character types that can be created using the game system.

The normal character creation system has been utilized to create these NPCs, though some values for skills have not been shown due to their lack of relevance to most encounters. Additionally, though no optional rules have been utilized when creating these NPCs, the values stemming from those rules can be easily created.

These NPCs have been given Language and Knowledge skills that reflect a North American, English-speaking setting. The GM is encouraged to alter these as appropriate to the setting.

Decent game, pretty easy. Unfortunately 2 of the achievements are broken. The dev has known about the issue for at least 3 months and hasn't corrected the problem, but has released 5 more games in the meantime. I plan to avoid games from this dev in the future.

Still nothing more than 6 months later, and just over a year since the problem was first mentioned and a fix promised. Useless dev.. It's great.. Great game. Probably one of the few rare EA games that have a lot of potential. Only thing to note is the atrocious performance. Make sure your pc is better than average or your gonna be facing the same problem as me, which is 30 to 40 fps on low settings.. Tried it twice before I decided---its not for me. Gunplay and movement felt good. gameplay is light and it has a free to play, mobile feel to it. It's a no go for me.. literally the best game ever made. Fun game , light n fluffy cute

Great story with choices that actually matter. I will always remember these games fondly.. LIT, A MUSTPLAYYYYYYYYYY.
Bought this game in sale and you know what? It's very solid.

I was looking into some action adventure, this game looked interesting enough and the toon effect reminds me to borderland so.. why not?

Result: wasn't expecting much but this game impressed me a lot.

Nice atmosphere, the action plays better than expected, using the blade is fun and the puzzles are very well done.

Cons? The graphic has style but maybe not the best (at least not the usual 2D game) but I think is more than enough.

Many people wrote that the walking is slow.. it's sure not fast but for me it's super ok.

Btw: it runs also with my super cheap GPU so that's also cool.. Wow! The puzzles, atmosphere, and mechanics in this game are so unique! I've never played anything like this before and it's truly beautiful! I feel like I am a kid again and playing Zelda or Final Fantasy VI for the first time. It's magical! I won't say more than that. It's too easy to spoil the game. Just buy it now before social media spoils it for you. 10/10. Very impressed with this game so far. It has a beautiful aesthetic that looks really great. At first it's a bit strange to see that there aren't any textures in the game, but then you notice the subtle details in the models or the lighting and the spot use of color and after a while it really grows on you. Love the Farm Country level, it's gorgeous and fun to explore. Really wasn't expecting the kind of gore at the farm crime scene and this is when I realized that the visual aesthetic helps to make it feel more like a cartoon which means it's easier to stomach.

The gameplay is pretty much exactly what it says on the store page - it's a point and click adventure game in first person. At first I was worried that it would get boring, but I think the developer has found the right balance between exploration, clue finding and story so it doesn't feel like a walking simulator. Really interested to see where this goes. Sure, it's a bit short but if it actually gets up to 6 hours long when it's finished then I think it'll be worthwhile. Especially knowing that you get all the future updates for free.

Absolutely recommend this game and excited for the next update!. Achievements. This game looked like a lot of fun, but due to the gameplay it just isn't. It sort of reminded me of the oldschool game Slime Volleyball, and it seems like its heart is in the right place, but it just isn't that good.

I wish I had some constructive criticism for what could be done to make it better. I'd start with the physics- it's just too frustrating to try to hit the ball. On top of that it's way too hard to aim and get it into the goal. I thought volleyball was alright, but after trying it again I've decided that I don't think that's a redeeming quality either- once you lose one point, you're almost guaranteed to lose 2 or 3.

If I had to say something good about Soccertron it's that the menu system is easy to navigate. However, the game mode selection interface is too in-your-face big.

I'm sorry, but I would have to say to avoid this game.

On a sidenote, I tried letting the computer play against an idle player and thought it was funny that the idle player won one of the games.
